

20140040 Keonil Kim

1. I am a student in SoC, an amateur swimmer, a piano/viola player, a personal investor and a writer. The priority goal of this semester is not to drop this course.
2. There are a few reasons. First of all, obviously, I consider the knowledge on network system crucial and useful and I believe this class is the most informative course offered. Secondly, this class is taught by the professor who speaking extremely fluent English. I expect to improve my English skills through this course. Furthermore, taking this class is also a personal challenge to me. Although it is not official retaking since I dropped the course in the middle of the last semester, I'm actually retaking this course. I would really like to finish this course successfully.
